

GANESH SADASHIV KALAPAD

 Pune, Maharashtra  +91 8830080013  ganeshkalapadgk@gmail.com  linkedin.com/in/ganesh-kalapad  github.com/gk155586

PROFESSIONAL SUMMARY

Performance-driven Software Engineer with hands-on experience building high-scale, real-time web systems. Experienced in architecting decoupled full-stack platforms using React.js, Node.js, and Next.js, managing monorepos, and containerizing microservices. Confirmed history of developing secure API endpoints and integrating real-time telemetry, backed by academic publications in deep learning and NLP.

TECHNICAL EXPERTISE

Languages & Frameworks: Java, JavaScript (ES6+), TypeScript, Python, C, PHP, Next.js, React, Express.js, JDBC, OOP
Databases & Caching: MySQL, PostgreSQL, MongoDB, Redis, Prisma ORM, Mongoose
Tools & DevOps Platforms: AWS, Docker, Git/GitHub, Socket.io, Turborepo, REST API Development, JWT Auth, XAMPP, VS Code

WORK EXPERIENCE

Software Developer Intern <i>YugaYatra Retail (OPC) Private Limited</i>	Feb 2026 – May 2026 <i>Remote</i>
- Architected and developed **FreshIn10**, a production-ready full-stack quick-commerce platform delivering orders within 10 minutes. - Built a modular monorepo system encompassing customer, administrative, and delivery portals using Next.js 15 and Turborepo. - Developed 50+ secure, robust REST API endpoints using Express.js and Prisma ORM, implementing JWT role-based authorization. - Integrated **Socket.io** for real-time order status telemetry and geolocation tracking, reducing update latency by 40%. - Optimized application state and database queries using MongoDB, Mongoose, Redis caching, and Zustand global state management. - Managed payment gateway integrations with Razorpay for secure client-side checkouts and transaction processing.	
Java Developer Intern <i>Previous Company</i>	Jan 2026 (1 Month) <i>Remote</i>
- Contributed to UI layouts and backend controllers for enterprise web applications using Java. - Developed database integrations and connected backend services with frontend interfaces to guarantee seamless data flow.	

KEY PROJECTS

AI E-commerce Personalization Rules Engine	React, TypeScript, OpenAI API, Zustand, Tailwind
- Developed an AI-powered engine classifying shoppers into segments (Browser, Discount Seeker, Cart Abandoner) using event streams. - Integrated OpenAI API for automated shopper behavior analysis, evidence-based reasoning, and confidence scoring. - Built a real-time session simulation interface to test classification updates and personalized discount code triggers.	
SK Photo Studio Administrative Platform	Next.js 16, React 19, Tailwind CSS, Framer Motion
- Engineered an administrative platform using Next.js 16 and React 19 to streamline content workflows. - Developed a secure administrator dashboard with dynamic "Edit Mode" for content manipulation and database synchronization.	
Real-Time News Sentiment Analyzer	Python, NLTK, TextBlob, Pandas, Render
- Built an NLP sentiment analysis pipeline extracting articles from 10+ sources and classifying sentiment in real-time. - Deployed an interactive Render dashboard visualizing media sentiments, published in IJIRT (Vol. 12, Issue 8).	

RESEARCH PUBLICATIONS

- **Classification of Brain Tumors Using Deep Learning and Transfer Learning Techniques**** (IEEE / Journal)
Engineered a CNN classifier using VGG16, ResNet50, and MobileNetV2 models, achieving a peak accuracy of ****98.6%**** on clinical brain scan datasets.

ACADEMIC BACKGROUND

B.Tech in Computer Science & Engineering MGM's College of Engineering, Nanded	2022 – 2026 CGPA / Percentage: Pursuing
Higher Secondary Education (12th) State Board	Class of 2022 Score: 83%

ACHIEVEMENTS & LEADERSHIP

- **Devtown Ambassador****: Lead local developer community meetups, coding bootcamps, and software workshops.
- **Visitech 2025 Volunteer****: Facilitated logistics and system configurations for campus-wide technical symposium.
